

# WATERCOLOR RESIST WITH CRAYONS

## What You'll Need

- White paper
- A white crayon
- Watercolors
- Paintbrushes
- Water

## Today's Activity

Creating a watercolor resist drawing. Trace or copy our doodle ideas on the next page or create your own design!

## How It Works

Create your design on a blank paper using a white crayon. Then, paint over your entire design using the watercolors. The crayon creates a barrier that prevents the watercolor from covering those areas.
