

CHALK PRINTS PROJECT

What You'll Need:

Chalk pastels or sidewalk chalk, watercolor paper or cardstock, a plastic tub that the paper will fit in, water

Procedure:

1. Fill up the tub with water so that the bottom is completely covered.
2. Tap or scrape dust from the chalk into the water. It does not have to be a lot but it should be evenly dispersed.
3. Dunk your paper into the water.
4. Take out and let dry.

These are great for notecards or gift tags!
