

EASY PRINTMAKING

What You'll Need:

One clear plastic sheet protector, a photo or drawing, washable markers (sharpies will not work!), 1 damp paper towel, plain copy paper

Procedure:

1. Place your photo inside the sheet protector.
2. Trace the photo on the sheet protector using your washable marker.
3. Wet your copy paper using the damp paper towel.
4. Press the damp side of the paper onto the sheet protector. For best results, press hard around the entire traced area.

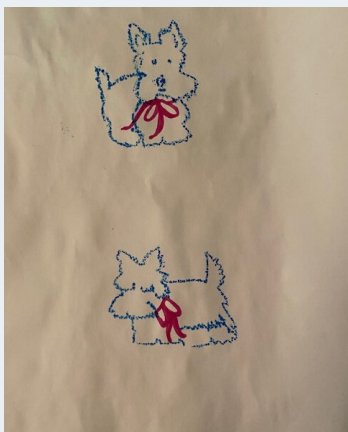

EASY PRINTMAKING

We used a piece of fabric that had a pattern on it. This is before tracing it.

After printing & air drying.

Add details afterwards with markers!
