

POP UP HOUSE

3-D EXERCISE

What is 3-D?

3-D means three dimensional. Works of art that are 3-D take up space instead of being on a flat canvas.

Supplies:

- White Construction Paper
- Pencils & Erasers
- Scissors
- Glue

Procedure:

1. Cut two identical rectangles out of your construction paper.
2. Cut a slit halfway down both rectangles and fit together.
3. Draw the interior of your house on the rectangles & color.
4. Unfold so that you have what looks like a large +
5. Create the "floor" of your house using a second piece of paper (cut to fit your rectangles).
6. Glue your rectangles onto your "floor".
