

DIY SCRATCH ART

Supplies:

- White Construction Paper
- Crayons
- A sharp object like a tooth pick, chopstick, or screwdriver

Procedure:

1. Mark off the area on your paper that you want your scratch art to be. We used a rectangular shape.
2. Color in this space using colored crayons. You don't have to create a pattern or use specific colors but make sure to press hard so that you create a layer of wax.
3. Color over top of this area with a black crayon. Make sure to press hard!
4. Use your sharp tool to carve out areas in a pattern or pictures.
