EASY
HOLIDAY TREE PAINTING

Supplies:

-washable paint (different shades of green or white and black to mix with green)

-construction paper

-paint brushes

-water glasses to rinse brushes

Procedure:

Start with three dots of paint towards the bottom of the page. Use your brush to create downward strokes on the page. This will create the bottom layer of your tree. Repeat the process for the next layers, changing shades of green. Once you're finished, you can add other details like decorations of a background. For more advanced artists, repeat the entire process and add more trees in the background!
